

SOCIAL HAPPENINGS

NELL SCULLEN, EDITOR

PHONE 44-W

Miss Elizabeth Thompson, first grade teacher, has returned from Stetson University where she took a summer course.

Thomas Creech, son of Mrs. Hans J. Stein, has gone to Norfolk, Va., where he will begin training for the U. S. Navy.

Mrs. Flood S. Andrews and children, Nancy and Bobby, have returned from Grand Rapids and Detroit, Mich., where

they spent several weeks. On the return home, they visited Capt. Flood Andrews at Fort Benning, Ga.

Mrs. Kenneth Lutz and children, Beverly, Kay and Kenneth Jr., have returned from a trip to Mexico City and Hot Springs, Ark.

Junius Harris has returned from Gainesville where he took a short course at the University of Florida.

Mrs. Harold Elsberry and children have returned from Memphis, Tenn., where they visited her mother, Mrs. Marie Pearson.

Mrs. Charles J. Fontaine and baby, Frances Mosley of Jacksonville are here visiting Mr. and Mrs. Robert Y. Creech.

Miss Mary Hall expects to leave Saturday for Gainesville.

Frank Anderson has gone to Fort Wayne, Ind., where he will spend several weeks on business.

Miss Ormabel Bender and Miss Ann Bender have returned home after visiting their brother-in-law and sister, Mr. and Mrs. Edward Walsh in Atlantic City, N. J. Mrs. Walsh and children, Donald and Patricia accompanied them and will visit her parents, Mr. and Mrs. Guy Bender.

Mr. and Mrs. Bryant McLendon and daughters, Misses May and June, and Miss Isobel Swift have returned from Hightown, N. J.

Mr. and Mrs. F. D. Stevens and sons, Frederick and Albert,

TROPICAL SKATER

No, this isn't Sonja Henie in California. It's Ice-Capet Shirley Davies in the Tropical Garden of the Florida State Exhibit in Atlantic City.

have returned from an extended visit to Mrs. Stevens' parents, Mr. and Mrs. Clay Daspit in Houma, La.

THINGS THEY LEARNED

(Continued from page 1) about an inch and a half in length. After the worms have become full grown they drop to the ground and burrow beneath the soil surface to form the pupae or resting stage. This explains the sudden disappearance of the worms that growers have observed. After about six days in the resting stage the adult moths emerge and begin laying eggs. During the summer and fall months the time required to complete the cycle from egg to egg is twenty to twenty-five days and is longer during the winter months.

There are a number of small wasp-like insects which parasitize the budworm. Birds and toads also destroy large number of the budworms. The red-winged blackbird, the boat-tailed grackle and the meadow lark are three of the more important birds feeding on budworms in this section.

As already stated if it becomes necessary to apply an insecticide a spray of lead arsenate should be applied when the budworms are small. There is little to be gained by spraying after the worms reach an inch in length because they are difficult to kill and most of the damage has been done.

WILLIS WAILS

(Continued from page one) We'll be coming around to see all you fellows who operate a business of any kind using a trade name other than the proper name of the person owning the business. It's a law and requires that the trade name be published in a newspaper for four weeks and then be filed with the Clerk of the Court in the county in which the business is located. It's a good law we think and sure is a "break" for the newspaper. It'll cost you about five bucks for the four publications and I'll be around Monday for your copy for the publication. A copy of the law is published elsewhere in this issue.

Principal and Mrs. E. F. Johnwick moved into one of the Willis apartments the first of the week. Mr. Johnwick has recently returned from Gainesville where he took his master's degree at the University of Florida during the summer.

Mr. and Mrs. M. E. Cooper Mr. and Mrs. Bill Lundy enjoyed an outing at Fishcreek on Sunday and visited Mr. and Mrs. Albert Gatling.

Miss Irene Dawson spent the week in South Bay and Belle Glade looking after property interests. Miss Dawson formerly taught here and has been teaching in Westgate for several years.

Mr. and Mrs. Charles Deaton of Avon Park were the weekend guests of Mr. and Mrs. Bob Varner.

Miss Betty Rawle of South Bay who spent the summer with her parents, Mr. and Mrs. W. H. Rawle at Charleston, S. C., where Mr. Rawle is employed in the Navy Yard on national defense work, has returned to Tallahassee to resume her studies as a Junior at the Florida State College for Women.

SINGERS MEET

A sing was conducted at the Lake Harbor Community church Thursday evening in honor of Miss Jimmie Hudson, visiting pianist.

A large crowd was in attendance among whom were Mr. and Mrs. John Kirk and Mr. and Mrs. John Cunningham of Belle Glade.

To the Voters and Citizens of Belle Glade

I wish to take this method of expressing my sincere appreciation for the splendid vote I received at the town election Tuesday. I consider the vote an expression of confidence and an endorsement of the administration of the Mayor's office during the past two years, which was my first term as your Mayor.

You may be sure that this office will continue to be administered by me for the best interests of all the people of Belle Glade.

To those of you who saw fit to support one of the other candidates for this important office I want you to know that I am your Mayor as much as though you had been my strongest supporter and your interests in Belle Glade are also my interests and I shall ever strive to serve you capably, honestly and impartially.

Again I want to thank you for the splendid vote of confidence given me at the polls Tuesday.

A. E. KIRCHMAN, Mayor

POWER FOR NATIONAL DEFENSE

★ For the first time, all the major privately owned power systems in Florida are interconnected—united for defense. Whatever and wherever the emergency, Florida's power companies are prepared to meet it and keep the power flowing to thousands of homes and businesses—and to the scores of army camps and defense projects in the state.

★ Here is an entire industry, composed of many separate companies, united for the common good and for national defense.

NEW LAW

(Continued from page 1)
herein defined, without and unless said fictitious name shall be registered with the clerk of the circuit court of the county where the principal place of business is, which registration shall consist of filing with the clerk aforesaid an affidavit signed by all interested in the business enter-

prise, the extent of the interest of each, and fictitious name under which said business is carried on. Said registration may not be made until the person or persons desiring to engage in business under a fictitious name shall have advertised his or their intention to register said fictitious name at least once a week for four consecutive weeks.

THEY HAVE THEIR CAKE AND EAT IT

In the case of some profitable farm practices it is actually possible to reverse the old adage and make it read "You can have your cake and eat it, too." This is particularly true in the case of farmers who are following recommendations of their county agents and applying fertilizer to their fall wheat crop. By doing so they not only will get increased yields of wheat but also add fertility for the following year's hay crop.

"It is not infrequent for the increased yield of clover and other hay during a two-year period following wheat that was fertilized with complete fertilizer," according to H. R. Smalley, Director of Soil Improvement Work, The National Fertilizer Association.

On a demonstration farm in Michigan, the increased yield of alfalfa hay during a two-year period following wheat which was fertilized with complete fertilizer, amounted to 3,771 pounds of hay. At the average price of alfalfa hay, the increase is worth \$18.00 an acre for the two years.

One of the best ways to start a high-producing pasture is to fertilize the wheat crop heavily this fall and seed the pasture next spring. In an experiment at Wooster, Ohio, an application of 450 pounds of fertilizer gave an increase of 18 bushels of wheat and more than doubled the pasture yield for several years following.

SOUTHERN FARMERS SPEED DEFENSE PASTURES

Answering the call of national defense for an unlimited increase in dairy products, southern dairymen, livestock producers, and agricultural leaders are joining forces to increase quantity and quality of production, cut feed costs, and extend the grazing season during which the cheapest and best feeds are available.

"In the South, economical production depends on securing a liberal supply of high quality home-grown feed at a minimum cost throughout as many days of the year as possible," declared R. H. Lash, pasture specialist, The National Fertilizer Association, at a recent meeting of North Carolina farmers.

Results from improved pastures show what can be done profitably to meet the increased demand. In Georgia, cows on permanent pasture treated with limestone and phosphate produce a 100 per cent calf crop two years in succession, though only 50 per cent of the cows on native unfertilized pasture produce calves.

Those attending were Mrs. H. D. Merriam, Mrs. J. S. Seagin, Mrs. J. L. Wood, Mrs. Neil Wil-

ling class, all of whom are progressing nicely.
